

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-1162
Project Name	Auto-Ticket Classification using Flow Designer
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	
Programming Language(s)	ServiceNow Flow Designer
Framework(s) Used	ServiceNow Flow Designer
Key Features Implemented	1. Automatic Ticket Classification 2. Keyword-based Category Assignment 3. Automatic Subcategory Assignment 4. Category and Subcategory Dependency 5. Automated Email Notification
Pending / Incomplete Features	None
Setup / Run Instructions	Open ServiceNow → Flow Designer → Auto Classify School IT Tickets → Create ticket → Enter Short Description → Submit

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	NO

Additional Notes / Comments:

The solution automatically classifies IT tickets using Flow Designer based on keywords and sends an email notification to the caller.
