

Empathy Map

Date	29 September 2026
Team ID	SWTID-2026-1162
Project Name	Auto-Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • My Wi-Fi is not working • My password is not working • The projector is not working	THINKS • My issue should be solved quickly • I don't know the correct category • I need quick IT support
STUDENT College Student	
DOES • Creates an IT support ticket • Describes the problem • Waits for the ticket to be assigned	FEELS • Frustrated when the issue is not solved • Confused about ticket categories • Happy when the issue is resolved quickly
